

Exterior and Colours

The personalisation of a Ferrari goes through the emphasis of chromatic and stylistic elements which permit a strong individual characterisation of the car, as shown on the following pages.

All the possibilities have been engineered in compliance with the style rules which are fundamental and imperative for Ferrari.

Exterior and Colours

PAINT COLOUR UPON SAMPLE

COD. MODIS: PNT1

It is possible to tailor the body paint in order to match the colour of whatever sample chosen by our client in the most accurate way possible. Three weeks are needed on average to make available the colour tests reproducing an individual sample. Once the colour is chosen, the personalised painting brings on average a delay of one month on top of the normal car delivery time. Ferrari commits itself to develop paints on sample in compliance with its standards of quality and of technical feasibility. The chromatic areas of red and yellow are excluded from the possibility of personalisation upon sample, since these are institutional Ferrari colours and therefore cannot be modified.

Available for coupe and spider version

OUT OF RANGE PAINT COLOURS

COD. MODIS: PNT0

As an option, the customer can also request a paint colour which is no longer available in the Ferrari colour range, but which was part of it in the past.

Available for coupe and spider version

Exterior and Colours

“SCUDERIA FERRARI” SHIELDS

COD. MODIS: LOGO

“Scuderia Ferrari” shields mounted on the sides of the front wings of the F430 Spider.

They are fixed into prepressed housings.

Available for coupe and spider version

Exterior and Colours

"CHALLENGE" WHEEL RIMS

COD. MODIS: RIM3

Fourteen spoke wheel rims, made in aluminium alloy with "Challenge" design and five titanium studs. The rim size is the same as for the standard wheel rims. They cannot be combined with the tyre pressure monitoring system (TPM0) and with the Run Flat tyres (FLAT).

Also available for installation on existing cars, provided the above mentioned restrictions.

Available for coupe and spider version

Exterior and Colours

BALL-POLISHED WHEEL RIMS

COD. MODIS: RIMX

The appearance of the ball-polished rim is characterised by a glossy finish which enhances volumes and shapes remarkably.

Ball-polishing is a special technical process capable of increasing material resistance and hardness. The standard wheel rims can be shot-blasted on request.

Also available for retrofitting on existing vehicles.

Available for coupe and spider version

Exterior and Colours

COLOURED BRAKE CALIPERS

COD. MODIS: CALR, CALS, CALY, CALA

As an option, both the standard cast iron braking system and the carbon-ceramic braking system can be equipped with brake calipers in the following colours:

- "Rosso Corsa" (CALR);
- "Rosso Scuderia" (CALS);
- "Giallo Modena" (CALY);
- "Aluminium Grey" (CALA).

Available for coupe and spider version
